PROFESSIONAL SUMMARY

Computer Engineering undergraduate with hands on experience building GenAI applications using LLM APIs, and working knowledge of RAG pipelines and agent frameworks. Strong DSA foundation with 500+ problems solved. Comfortable shipping full-stack AI products end-to-end and documenting design trade-offs.

EXPERIENCE

Software Engineering Intern (Certified)

May 2026 – Jun 2026

HackerRank

Remote

- Successfully completed HackerRank's Software Engineer assessment, demonstrating proficiency in data structures, algorithms, object-oriented programming, and software engineering fundamentals.
- Validated technical competency through assessments covering Java, SQL, REST APIs, debugging, and problem-solving aligned with industry standard software Development practices.

Open Source Contributor

May 2026 – Jun 2026

GirlScript Summer of Code (GSSoC'26)

Remote

- Collaborated with distributed development teams to contribute features, resolve issues, and enhance open-source projects through GitHub-based development workflows.
- Submitted production-quality pull requests, participated in code reviews, improved documentation, and adhered to collaborative software engineering best practices using Git version control.

PROJECTS

Quick AI - AI-Powered Content and Image Generation Platform

Jul 2025 – Aug 2025

React.js, Node.js, Express.js, PostgreSQL, Clerk, OpenAI API, Tailwind CSS, Vercel

- Built a GenAI content platform with 5+ AI tools, integrating LLM APIs for prompt-based text and image generation.
- Designed a relational PostgreSQL schema for user management, subscription billing, and AI request/response history.
- Implemented Clerk-based authentication and role-based access control, with query optimization for backend performance.
- Architected and deployed a modular full-stack application on Vercel using RESTful API design principles.
- Live Demo** | **GitHub**

Prescripto - Doctor Appointment Booking Platform

Oct 2025 – Nov 2025

React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, Tailwind CSS

- Engineered a full-stack healthcare platform with secure role-based access control for Patients, Doctors, and Administrators.
- Designed and documented RESTful APIs for appointment scheduling, authentication, availability, and patient data workflows.
- Integrated Razorpay payment gateway and built an admin dashboard for transaction and appointment monitoring.
- Optimized backend performance via efficient MongoDB query design and asynchronous request handling.
- Live Demo** | **Admin Dashboard** | **GitHub**

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript

AI/ML & GenAI: LangChain, LangGraph, RAG Pipelines, Vector Databases, Prompt Engineering, LLM APIs, FastAPI

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, Role-Based Access Control (RBAC), Microservices

Databases: PostgreSQL, MongoDB, SQL

Core Subjects: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

EDUCATION

B.Tech in Computer Science Engineering

Sep 2023 – 2027

GL Bajaj Group of Institutions, Uttar Pradesh

Central Board of Secondary Education (CBSE)

Class XII

Apr 2022 – Mar 2023

Class X

Apr 2020 – Mar 2021

ACHIEVEMENTS

- Secured **Institute Rank of 66** on **GeeksforGeeks**.
- Solved **500+** DSA problems and achieved a Contest Rating of 1656. **LeetCode**.
- Recognized as one of the **Top 10 coders** in the college.

CERTIFICATIONS

- Google Cloud Agent AI (October 2025) [Link]
- Programming In Java, IIT Kharagpur (Jan 2025 – May 2025) [Link]
- Deloitte Australia - Technology Job Simulation (July 2025) [Link]
